

The Ravin Group will provide specialised fire survival cables for the famous Indian Railways' Udhampur-Srinagar-Baramulla rail link, which was designated as a national project in 2020. Ravin was picked as the ideal partner due to the company's competence, technical acumen, product knowledge, and experience.

Ravin will supply 33 kV and 11 kV medium voltage specialised fire survival cables, as well as low voltage and control cables, to the longest tunnel (T13), which has an approximate length of 9.3 km and is located in the Katra-Dharam segment closest to the world's highest Chenab bridge.
