

**Rays Power Infra** has entered into an agreement with the Rajasthan government to construct a cutting-edge PV Photovoltaic (PV) Power Station, also known as a solar power plant. In keeping with India's ambitious goal of converting existing fossil-fuel energy generation into renewable energy output.

The Solar Park will generate 1800 MW of renewable energy, which will be split between three 300 MW projects and one 900 MW project. The total cost of the largest project in the country is estimated to be Rs 9140 Crore.

Pawan Sharma, Director- **Rays Power Infra** said, ".Rays Power Infra was established with the goal of promoting cleaner, greener, and better environmental circumstances. We have created best-in-class solar projects in India and overseas, based on rigorous research and development, testing, and commissioning."
