

ReNew Power has completed Gujarat's first wind-solar hybrid project of 17.6 MW at [Grasim Industries Ltd](#)'s Chlor-Alkali facility in Vilayat, Bharuch.

The business said in a statement that the first phase of the hybrid project, which includes 17.6 MW of commercial-scale wind-solar, began operations last week and is expected to create 80 million units of renewable energy per year while reducing 75,000 tCO₂e (carbon emissions) annually.

As part of the second phase, the partnership will add an additional 16.68 MW, which will be commissioned in the next financial year (FY23).

ReNew Green Solutions (RGS), ReNew Power's B2B arm, is working on the project.
