

Renewable energy solutions provider Suzlon has secured a 69 MW wind energy order from the Indian subsidiary of a leading Nordic Energy Company.

According to a Suzlon release, the order is for the development of a 69 MW wind power plant for the Indian subsidiary of a well-known Nordic Energy Company.

However, the corporation chose not to make the order's value public.

23 wind turbine generators (WTGs) with a Hybrid Lattice Tubular (HLT) tower and a 3 MW rated capacity will be installed by Suzlon.

"At Suzlon, we take great pride that a leading Nordic Energy Company with a proven global track record in renewable energy has placed their trust in Suzlon for their first wind energy project outside of Europe," JP Chalasani, Chief Executive Officer, Suzlon Group, said.
