

The Rhenus Group has opened two new multi-user chemical warehouses in Jamalpur (Gurugram) and Bhiwandi as part of its announcement that it was entering the Indian logistics market (Mumbai).

Rhenus is also launching Rhenus Tower, a structure situated in the heart of Mumbai's Andheri logistics centre.

Rhenus India now offers 31 strategically placed warehouses that are completely compliant and accredited, totaling more than 2.4 million square feet of storage capacity, including dedicated and multi-user facilities.

A heavy-duty selected pallet racking system for customised storage, shelf systems for smaller/replacement components, an automated vertical lean storage system for safe and effective product storage, and temperature-controlled/cold-room storage facilities are some of the latest storage options.
