

R K Singh, the minister of state for energy, ordered **NTPC** to more than double its capacity by 2030. At the 48th Raising Day of **NTPC** here, he predicted that by the year 2030, India's installed power capacity would reach 800 GW.

He stated, "**NTPC** must contribute at least 25% to 800 GW level."

**NTPC** currently has 70,000 megawatts of installed capacity, which includes thermal and renewable sources.

**NTPC** must increase its capacity as the demand for power will continue to grow in India and the company must eye for a larger share in the market, he said.
