

Royal Waste Management, a leading waste management company in India, is planning to establish a new common biomedical waste treatment facility in Pargodih, Jamua, Giridih, Jharkhand. The company has been operating in the waste management sector for several years and has built a strong reputation for its high-quality services and commitment to environmental sustainability. The proposed project involves the establishment of a state-of-the-art biomedical waste treatment facility with a capacity of 1800 TPA. The facility will be designed and built to meet the latest environmental and safety standards, ensuring that all waste is treated and disposed of in an environmentally responsible manner. The estimated cost of the project is Rs. 31 million, and construction is scheduled to begin in August 2023, with completion expected by December 2023. As of February 2023, the company has submitted its proposal and Terms of Reference (ToR) to the Ministry of Environment and Forests, and is awaiting clearance to proceed with the detailed project report.
