

Satia industries limited has successfully commenced commercial production from paper machine 4.

PM 4 is a state-of-the-art paper machine and one of the most advanced machines from Allimand, France. The new PM 4 will be producing value added paper products like Copier, Surface sized Maplitho, Cup stock, Wedding base and Carry bag paper.

PM 4 gives SIL an opportunity to manufacture superior quality paper and allows it to add new products to its current product mix and serve a wider spectrum of the Paper market with quality at par with wood based mills.

PM 4 will enable SIL to have an additional capacity of 300 TPD and will yield higher price realization and margin as SIL is planning to foray into newer product segments and markets emerging with single use plastic ban coming from July 2022 as announced by the govt. The total aggregate installed capacity of SIL will be 205,000 MTPA which is twice the existing capacity.
