

Servotech Power Systems on Tuesday has announced starting the manufacturing of high-tech EV chargers to mark its entry into the electric vehicle (EV) space.

In a statement, the company said, “Servotech Power Systems Ltd, which is engaged in the manufacturing of high-end solar products, medical devices and LED lighting solutions, initiates the manufacturing of smart tech-driven innovative EV chargers for installation at various EV charging stations across the country.”

Announcing its entry into the electric vehicle market, the entity said the decision is in line with its vision of developing solutions in accordance with the government’s Make In India initiative and steering the nation towards a greener and sustainable future.

The company’s founder and MD Raman Bhatia said, “Our new initiative of aiding the establishment of EV charging technological infrastructure across states reflects our serious deliberations for paving a path towards new avenues and possibilities for all.”
