

Shree Pushkar Chemicals and Fertilisers has announced the start of trial production at unit five of MIDC Lote Parshuram in Ratnagiri.

The new plant has a 66,000 MTPA capacity for sulphur chemistry and derivatives and a 7,200 MTPA capacity for dye intermediates. It's a fully integrated facility. The plant's dry trial run was completed successfully, and trial production began on March 27, 2022.

The integrated facility's commercial manufacture of dyes intermediates will begin after the successful completion and commencement of commercial production of sulphur chemistry and its derivatives products. This will let the firm offer dyes and dye intermediates to customers all around the world.
