

[SMC Power Generation](#) is a power generation company that is planning to set up a new pulverized coal injection unit installation project in the industrial growth center of Kukurjanga, Po-Badmal, Jharsuguda, Odisha. The project involves the installation of a new pulverized coal injection unit that will have a capacity of 12 TPH and will include a blast furnace with a capacity of 450 cubic meters. The installation of the pulverized coal injection unit will enable the company to produce high-quality steel by increasing the efficiency of the blast furnace. The project is expected to cost around Rs.143.4 million, and the company is committed to completing the project within the estimated budget and timeline. As of March 2023, the company has received consent from the state pollution control authorities to establish the project. This indicates that the company has complied with all the necessary environmental and regulatory requirements, and the project is expected to have minimal impact on the environment.
