

Sudarshan Polyfab Private Limited, a Yash Management & Satellite Limited company, has successfully started commercial production at its greenfield unit at Divine Industrial Park, Laxmanpura (Dist. Mehsana, Gujrat).

Sudarshan Polyfab picked Lakshmanpura, Mehsana district, Gujrat as the location for its first production plant since this area has emerged into a major cluster of the country's top woven sack players.

The plant, which has a manufacturing capacity of 4800 MT per year, was built to produce PP/HDPE woven fabric and laminated/unlaminated bags.

The manufacturing building has a total area of over 100,000 square feet and was developed utilising a combination of Indian and American regulations. The highest-quality machinery has been sourced from all across the world. The Duotec Tape Extrusion Line (one) and Circulate (two) from Lohia Corp are two of these devices.
