

In Bhubaneswar, Odisha, TCR Engineering launched a new materials testing project. The business specialises in testing industrial equipment used in numerous projects involving industries such as electronics, capital goods, steel, cement, nuclear power, and capital goods, among others.

The third centre in India and fifth worldwide, according to a statement from Mumbai-based TCR Engineering.

The facility will offer thorough testing and analysis services to clients in a variety of industries around the state.

According to the corporation, it will also focus on serving clients in the eastern and northeastern regions
