

TCR Engineering, located in Maharashtra, is working on 84 gas pipeline testing projects across the nation.

The organisation, which has its headquarters in Mumbai, conducts quality testing on parts used in a variety of projects for the steel, automotive, chemical processing, defence, electronics, nuclear power, and capital goods industries, among others.

“We are currently undertaking Non-Destructive Test (NDT) and inspection activity on gas infrastructure pipeline projects at over 84 sites across India. Our role includes testing or inspection of the pipelines and giving them certification,” the company’s global president RohitBafna
