

The third 800 MW supercritical unit at the Sri DamodaramSanjeevaiah Thermal Power Station (SDSTPS) goes on stream , providing some relief to Andhra Pradesh, which has been experiencing a power shortfall during evening peak hours.

The supercritical plant at Krishnapatnam receives water for its cooling towers through a specially-laid open channel from the Bay of Bengal, located around five kilometres distant, in a first for the nation.

Opposition parties have also voiced criticism, alleging that the [AP Power Development Corporation Limited \(APPDCL\)](#) is in the process of privatising every aspect of the SDSTPS operations.
