

The Uttar Pradesh New & Renewable Energy Development Agency (UPNEDA) has awarded [Servotech Power Systems Limited](#) a Letter of Intent (LoI) for a significant 1.8 MW off-grid solar project, installing solar-powered modules of various capacities throughout the state. Approximately 30 crore is the total contract amount for the entire project.

Raman Bhatia, Founder and Managing Director, Servotech Power Systems commented on being awarded the LoI for this project, “In order to promote green energy generation and proliferation across industries, this partnership will highlight the diversity of our work and targeted project implementation. Off-grid solar projects are revolutionising the renewable energy sector, marking our first and crucial step towards achieving grid-independence, which will eventually enable us in achieving zero-emissions in the future. When we consider these implications and future prospects that emerge in the light of these developments, this 1.8 MW off-grid project is of great consequence and is truly an indication of Servotech’s capability to pioneer world-class solar projects.”
