

A 1 MW green hydrogen project has been secured in Maharashtra by Waaree Renewable Technologies, a provider of end-to-end solar solutions. The project will be carried out by it on a built-own-operate basis after it was awarded it by Mahatma Phule Renewable Energy & Infrastructure Technologies.

The project will be finished in 12 months. A fully-owned subsidiary firm of Mahatma Phule Backward Class Development Corp., which is a department of the Maharashtra government, is Mahatma Phule Renewable Energy & Infrastructure Technologies. It works on initiatives in a variety of fields, including as innovative and developing technologies and renewable energy (especially green hydrogen and futuristic energy integration).

Waaree Renewable Technologies works on PV project installation and commissioning as well as module design and production.

The company has now forayed into green hydrogen and is looking to collaborate with technology partners and other hydrogen value chain stakeholders for an electrolyzer gigafactory.
