

Solar equipment manufacturer [Waaree](#) announced that it would increase its module production capacity from nine GW to 12 GW by March 2023.

A 9 GW module production plant is currently in use by Waaree, a top producer of solar panels. According to a corporate release, the company is also adding to its module manufacturing capacity, bringing it to 12 GW for a 650-watt module by March 2023.

According to the statement, this will be the greatest module manufacturing capacity outside of China.

Waaree is the only company in India permitted by ALMM (Approved List of Models and Manufacturers) to ship high-wattage panels from its manufacturing plants in Surat, Chikhli, Tumb, and Nandigram, including panels with 650WP, 600WP, and 540WP.
