

The reconstruction work at the Yeshwantpur railway station has started and is planned to be finished by June 2025.

The project is being carried out by [Girdhari Lal Construction Pvt Ltd](#) for a cost of INR 380 crore using the EPC method (engineering, procurement and construction contract). A predicted increase in daily foot traffic from the current 60,000 to more than 1 lakh is anticipated at the renovated station.

The renovated station will serve as a “city centre,” drawing tourists and commuters alike. In order to reduce congestion, there will be a 216-meter-wide air concourse with separate arrival and departure gates for passengers. The platform’s intended roof plaza will have shops, a food court, entertainment venues, etc.
